**Questions and Answers (For Information Only)**

1. Question 1: With reference to the work shown on plan sheet 41, it is noted that plan drawing 29 identifies only two poles – one is UP60873BB along the west side of Tea Street; the other is BT461BB along the access drive to Shop-Rite. Per plan sheet no. 41, underground conduit (s) is (are) to run to the power pole for providing service to the sluice gate motor operators related to drainage structures 3 and 4.  
As the plans identify these two poles only, are these to be the source of power?  
Does the existing power on the pole (s) accommodate the requirements for the sluice gate motor operation? Has the USACE contacted PSE&G? If so, please provide contact information and job order number information so that PSE&G may be contacted.  
It is noted that the limit of disturbance on the project precludes pole UP60873BB, and the project designers possibly consider use of pole BT461BB.  
Is the conduit run to the source (s) to follow the limit of disturbance; if not, have easements and access been acquired to perform the work (if so, please advise)?

?

Response 1: Sheet 41, included with this amendment, has been revised and shows the conduit run within the permanent project levee easement.

2. Question 2: Specification section 00800, page 75 (of 88), item 14. Field Office and Vehicle, under paragraph letter d., requires a “One (1) partitioned meeting area having a minimum of 1,680 square feet of open floor area”. Is the above specification correct? If the trailer were 8 foot in width, then the meeting room would be 210 feet in length. Or is this to be a rented space

Response 2: This question was answered in Amendment 4 Response 11 and is clarified here: The correct dimensions are 24 feet in width and 60 feet in length.

3. This Amendment shall be attached to the specifications and shall be a part thereof.
